### **DETAILED ACTION**

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 8-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Examiner fails to find any support for any organic acid with the permethrin/imidacloprid/N-methyl pyrrolidone..

#### ***Claim Rejections - 35 USC § 102***

Claims 8-12 stand rejected under 35 U.S.C. 102(e) as being anticipated by  
ARTHER US 20020103233A1

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in

the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

See claims 5 & 6, 2 & 10- the instant composition @ the instant %, for application to control parasites on animals- fleas[0010], on dog & cat [0054]. Solvents are water, or n-methyl pyrrolidone , with cosolvents[0047], with water auxiliary [0048]. Antioxidants are @ [0052], organic acid , Novantisol acid @[0052].

***Response to Arguments***

Applicant's arguments filed 4/6/09 have been fully considered but they are not persuasive. Applicant's arguments are that Arther was not the inventor of part of claim 8.. However, the inventor is not the inventive entity of the instant invention, nor is the inventor listed as an inventor on the reference.
